8. Matters to be paid attention to when using motor

8-1 Unless it is used in accordance with the specifications, the performance and life may be considerably reduced .
Due attention should be paid to voltage and range for use

8-2 Avoid use or save the motor in the following environment.

- 1. High temperature and high humidity area.
- 2. Corrosive gas such as H₂S•SO₂•NO₂•Cl₂.
- 3. Dusty area.

8-3 Due attention must be paid to the handling and working environments because such objects as iron powder if attracted by the motor magnet, will cause noise, characteristic deterioration thus reducing the reliability.

8-4 Please confirm enough no problem of standards and laws and ordinances on your cellular.

8-5 To handle the motor, hold the motor case softly.

8-6 Rust of plate (steel) and similar edge should be OK.
